Continuation Sheet (PTOL-303)

Application No.

/KWANG B. YAO/ Supervisory Patent Examiner, Art Unit 2473

U.S. Patent and Trademark Office

PTOL-303 (Rev. 08-06)

Advisory Action Before the Filing of an Appeal Brief

Part of Paper No. 20100729

Schoebel suggests a central unit (root node in figure 1) that has modules (leaf and branch nodes in figure 1) that are interrupted (stand-by mode) and restored again (on-mode; changing from a stand-by mode to an on-mode is essentially the same afterrupting and restoring contacts because the node remains a part of the network architecture. For example, in stand-by mode the node is connected to the network but is not an active participant; see paragraph 00557.
